Let's Go - Making Walking and Cycling an easy choice for everyday travel

Implementing a package of works funded by NZTA and local partners to 'fast track' a community that can change travel behaviour through improved transport choices

A community that chooses walking and cycling on spectacular shared pathways and shared space streetscapes.

For the past six years we have been significantly investing in walking and cycling.

Walkways are for walking, not cycling. That's the message walkers and joggers are sending to the New Plymouth District Council over any suggestion the inner-city Te Henui walkway will be sealed.

Regular Te Henui walkway user Judy Eva has collected more than 50 signatures in the last three days against the council's plans to hard-seal the popular track.

"The people I have spoken to who agree with me are walkers, particularly the elderly, who use Te Henui instead of the coastal walkway because there's too many fast cyclists already using it and they fear being knocked over," she said.

She said this wasn't a campaign against cyclists, as she has no issue with them.

"It's the cyclists who want to go fast that we're trying to steer away from this area.

"I feel it will spoil the natural look of the walkway if it is sealed and many people agree it should stay the way it is," she said.
